CHLOÉ NEWELL

Curriculum & Learning Designer | K-6 Digital Learning Systems | Edtech Product Designer

Smyrna, GA (Open to Relocation) • linkedin.com/in/chloenewell • *Portfolio:* chloenewell.github.io/edtech

PROFESSIONAL SUMMARY

Learning designer and instructional leader with 13+ years of experience developing curriculum, interactive learning experiences, and data-informed instructional systems. Skilled at breaking complex concepts into clear learning progressions, identifying misconceptions, and designing experiences that help learners build and apply new skills. Experienced in leading curriculum planning, mentoring educators, developing professional learning, and collaborating across teams. Uses AI-assisted tools to prototype interactive learning concepts, improve workflows, and develop scalable educational resources.

CORE COMPETENCIES & TECHNOLOGIES

Social-Emotional Learning (SEL) • Learning Progressions & Prerequisite Sequencing • Child Development & Differentiation • Misconception Analysis & Feedback • Formative Assessment & Data Analysis • Game-Based Learning & Interactive Prototyping • Digital Learning Systems & UX • Editorial Review & Shared Templates • Educator Coaching & Professional Learning • AI-Assisted Content Development & Prototyping • Stakeholder Collaboration

PROFESSIONAL EXPERIENCE

Learning Experience Designer & Educator | Cobb County School District

Oct 2016 – Present

- Served as instructional lead across multiple subject areas; translating standards into scaffolded learning progressions, reusable team resources, and digital lesson frameworks; currently used by 8+ teachers.
- Designed and engineered an Excel-based instructional planning system that connects student assessment data, performance bands, and misconception analysis to targeted intervention groups and teacher-specific lesson plans; earned leadership praise and replicated across multiple schools.
- Designed and built 100+ interactive digital math, ELA, and cross-curricular assets deployed through the district LMS, using learning progressions and misconception-based sequencing for 500+ end users.
- Architected modular LMS course environments applying UX/UI best practices, including intentional navigation models and structured, accessible content sequencing for scalable content libraries.
- Integrated generative AI tools into weekly content production workflows, cutting turnaround time by 50% while maintaining standards alignment and instructional quality, consistently outperforming team benchmarks on equivalent deliverables.
- Led a platform adoption initiative that tripled active user engagement, directly improving the data quality and reliability of program reporting.
- Selected as inaugural data analyst for a new behavioral analytics initiative, tracking 300+ active student profiles and briefing a 10-member leadership committee monthly on trend findings that informed targeted interventions.
- Engineered an Excel-based workflow automation tool that cut internal task-completion time and outreach turnaround time by 50%, adopted organization-wide.
- Redesigned a shared weekly practice resource with consistent layouts, editable templates, answer keys, and student incentives; adopted and maintained by colleagues across multiple teams and school years.
- Delivered K–6 classroom and health instruction using learning-science principles and scaffolded instructional design to address learning gaps; integrated daily social-emotional learning through morning meetings and programs including Second Step and Quaver to develop communication, self-regulation, and decision-making skills.
- Led staff initiatives, mentored educators and student teachers, and facilitated professional learning; used AI-assisted workflows to develop instructional materials and prototype selected learning interactions.

Instructional Design Consultant | Freelance

Feb 2016 – Jul 2018

- Designed curriculum and digital learning tools across all subject areas for 3 K-12 district clients, achieving 100% adoption of new resources through structured needs assessments and end-to-end stakeholder rollout.
- Produced 50+ scalable curriculum resources including pacing guides and standards-aligned units and delivered 10+ professional learning sessions upskilling 40+ practitioners across multiple sites.

Operations Specialist | PowerPlan (Contract) *Summers 2018 – 2019*

- Engineered an 80+ page operational handbook and training manual inside an enterprise software company, standardizing onboarding and building a scalable, repeatable reference system adopted across departments; direct exposure to cross-departmental product and operations workflows.

Curriculum Design Lead & Team Lead | Ivy Prep Academy for Girls *Aug 2013 – Feb 2016*

- Redesigned core curriculum to target identified performance gaps, improving standardized assessment outcomes to a 97% pass rate.
- Directed cross-team curriculum planning, pacing, and instructional alignment for a 5-person team; promoted to department leadership within one year based on program outcomes.

Independent Content Developer | Teachers Pay Teachers *Ongoing*

- Designed and published standards-aligned instructional content across math, ELA, and social studies for independent, direct-to-educator sale, validating content quality and market demand entirely outside institutional distribution channels.

Summer Program Director | Pace Academy *May 2011 – Jul 2013*

- Supervised and coached a 5-person staff through structured performance feedback while designing and facilitating onboarding and training for new and returning team members.

Research & Assessment Analyst | University of West Georgia *Oct 2010 – Dec 2012*

- Evaluated program effectiveness, including a STEM program, synthesizing 50+ monthly data sets into stakeholder-ready visualizations, and designed standardized reporting templates that reduced data processing time by 30%.

SELECTED DESIGN & TECHNOLOGY PROJECTS

Trench Run | Designed a 20-minute game-based reading experience with a detailed interaction script, scaffolded skill practice, branching feedback, and playable prototypes of selected mechanics.

Phoneme Patrol | Designed an adaptive early-literacy game with confidence checks, misconception-based feedback, and playable prototypes of selected learning interactions.

Classroom OS | Designed and built a web-based classroom workspace prototype using AI-assisted coding, with task tracking, planning, and progress views.

EDUCATION & CERTIFICATIONS

Bachelor of Science (B.S.) in Education, University of West Georgia, Carrollton, GA (2012)

Science of Reading Certificate, Georgia Department of Education (GaDOE), October 2024

Implementing Agency PYP Certificate, International Baccalaureate, November 2020

Google Data Analytics Professional Certificate, Google / Coursera, March 2025

Google UX Design Professional Coursework, Google / Coursera, January 2023

TECHNICAL SKILLS

Excel (Advanced) • SQL • Python (pandas) • Tableau • Figma • Articulate Rise & Storyline (Branching Scenarios) • Claude & ChatGPT • Learning Management Systems
